Installing your new multimedia keyboard

- 1 If you have not already done so, disconnect your old keyboard. Many keyboards use purple connectors at the back of the computer tower, but yours may be different.

- 2 Connect the keyboard (purple connector) to an available USB port on your computer. USB ports may be located anywhere.

Optional: Connect the additional USB (black) connector to another USB port on your computer. This will enable the USB port on the keyboard.

Optional: Insert the pink connector into the microphone jack.

Optional: Insert the green connector into the speaker jack.

The keyboard will synchronize automatically. There is no need to restart your computer.

Installing your new keyboard (cont'd)

- 3** Connect your other peripheral devices to the keyboard.

Plug your headset or speakers into the headset extension port on the left side of the keyboard.

Optional: To use both headset and speakers, plug your speakers into the bypass jack attached to the green connector.

Plug your microphone into the extension port on the left side of the keyboard.

Use the USB extension port on the right side of the keyboard to connect other USB devices.

Note: If you did not make the optional connections in Step 2, you will not be able to connect other devices to your keyboard.

The keyboard only needs the purple USB connection to function.

Customizing keyboard hot keys

The hot keys at the top of the keyboard perform different functions depending on which of your programs is active.

For example, the Home button will launch your browser if the browser is not already open. If it is, then the Home button will take you to your Home page.

If you want to customize the hot key functions, download and install the driver located at: www.microinv.com/drivers

Changing key lock status

The green LED next to the Number Lock, Caps Lock, or Scroll Lock icon will illuminate if the lock is on.

Press the appropriate lock key to change the lock status.

Maintaining your multimedia keyboard

Regular maintenance ensures a longer product life and minimizes the chance of causing damage to your keyboard.

- Always disconnect the keyboard before cleaning it.
- Keep all liquids away from the keyboard working area to avoid spills.
- Do not try to repair any part of this product. Only Micro Innovations Corp. may service or repair its products.

Troubleshooting

Problem

The keyboard hot keys do not work, or the keyboard is typing the wrong characters.

The keyboard is not responding.

Solution

Uninstall any previous keyboard software on your computer.

Press a letter key. If the keyboard is still not responding, restart your computer.

Reducing the risk of injury

Some experts believe that the repeated use of any keyboard may injure your hands, arms, neck, or back. To reduce the risk of these injuries:

- Take frequent breaks and vary your tasks throughout the day.
- Keep your shoulders relaxed with your elbows at your sides.
- Position your keyboard so you do not have to reach for the keys or do not need to rest your wrists on sharp desk edges.
- Adjust the height of your chair so your wrists are straight.

If you feel any pain, numbness, or weakness, you should seek help from a qualified health professional immediately.

FCC Compliance Statement

KB3100MF

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction guide, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult a service representative for help.

Properly shielded and grounded cables and connectors must be used in order to comply with FCC emission limits. Micro Innovations is not responsible for any radio or television interference caused by using other than recommended cables and connectors or by unauthorized changes or modifications to this equipment. Unauthorized changes or modifications could void the user's authority to operate the equipment.

Responsible party:
Micro Innovations Corp.
1090 King Georges Post Road, Suite 104
Edison, NJ 08837
Telephone: 1(732) 486-0079

This Class B digital apparatus complies with Canadian ICES-003. Cet appareil numérique de classe B est conforme à la norme NMB-003 du Canada.
